## Nature Of Opinion

Docket Number: E-01345A-16-0036

Docket Position: Against

The ACC should carefully examine whether APS truly needs to change the rates at all. Do not make the same mistake Nevada did. Reinstate net metering, as they have now done, or build in other incentives to ensure that rooftop solar continues to have a reasonable rate of return. Solar customers should be allowed the same rate of return on their invested capital as the ACC allows APS and the value should be based on 20 years, not an artificially short time frame. The plan options are unfair and everyone should be able to choose a flat rate plan at the outset and change plans whenever they want to. The Renewable Energy Standard should be increased to 100% renewable energy by 2050.
